Pure Charge&Go X

HEAR WHAT MATTERS TO YOU

Signia Xperience

NEW
Rechargeable

signiausa.com/Pure-Charge-Go-X

The world around you is always in motion, just like you.

Most hearing aids are **limited** to two options:

1. They focus on sounds and speech **directly in front of you**. Even simple movements, like turning your head, can make it difficult to hear the person across from you.

2. They **pick up everything in your general area without any focus**. This can be overwhelming and make it difficult to concentrate on important sounds or people close to you.

Without the ability to adjust to your movements and the changing environment, you are open to missing out on life's most important sounds and conversations.

Introducing Signia Xperience Hearing Aids

Signia Xperience is the first hearing aid technology that allows you to **hear important sounds from any direction, in any situation - even when moving**. With other technology, you have to compromise on what you hear. But with Xperience, you benefit from hearing conversations with those in front of you while ALSO hearing what matters all around you!

With Signia Xperience, this hearing aid wearer is able to hear her friend from across the table. She can also easily hear the server from behind without being distracted or overwhelmed by the excess restaurant noise.

Once they leave the table and start walking, her Signia Xperience hearing aids will **automatically adjust** to her movements and allow her to continue her conversation with her friend, now at her side.

No matter where she goes throughout the day, her Signia Xperience hearing aids deliver a **natural and personalized sound** using **world's first acoustic-motion sensors** that analyze more aspects of sound than ever before.

Pure Charge&Go X

FEATURE OVERVIEW

- The world's first technology to **AUTOMATICALLY ADJUST** to changes in your environment and movements.
FACT 90% of activities involve motion.
- The world's first technology clinically proven to deliver **BETTER THAN NORMAL HEARING** in background noise.¹
FACT Sound quality is most important to hearing aid wearers.
- The world's first solution to hear your **OWN VOICE** as nature intended to avoid having your voice sound unnatural or loud.
FACT Signia OVP increased wearers first-fit acceptance up to 80%.²
- **EFFORTLESSLY RECHARGE** your hearing aids in the closed-top charger with easy-to-read LED status lights and an added drying function to keep your hearing aids moisture-free.
FACT Charging overnight provides a full day's use, and a fast charge option provides an extra boost.
- Connect to all compatible **BLUETOOTH** devices to stream calls, TV, video, music, and more to both ears.
FACT Bluetooth® low energy offers extended battery life when streaming versus the competition.
- **TINNITUS RELIEF THERAPY** available within the hearing aids, designed to make your life more comfortable.
FACT About 50 million US citizens suffer from tinnitus.

Accessories

StreamLine™ Mic

Small, hands-free mic streams high-quality sounds to one or both hearing aids.

- Connect to all compatible Bluetooth devices with stereo sound quality, indoors and outdoors
- Connect hands-free to all smartphones (iOS® and Android™)
- Connect with others in challenging listening situations

StreamLine™ TV

Easy, hands-free streaming from your television to your hearing aids.

miniPocket™

Discreet remote-control solution without the use of an app.

Signia App

Tailored to your personal preferences, the **NEW** Signia App allows you to get the most out of your hearing aids, including audio streaming, remote control, and remote support.

Note: The Signia App replaces the myControl, myHearing, and touchControl apps.

Did You Know?

- The Signia App offers advanced remote-control options (change programs, volume, etc.), audio streaming, and access to various hearing lessons to give you the opportunity to personalize your hearing aids to meet your needs and learn at your own pace.
- The Signia App gives you access to TeleCare™. Ask your hearing care professional if they use TeleCare and if so, you will be able to stay in touch and get support from them when needed directly through the Signia App. This is especially helpful if you are unable to visit them in person.
- Your hearing aids will function without the Signia App. You can use the miniPocket for remote-control functions. If you would like access to TeleCare or plan on streaming, you will need the Signia App on your smartphone.
- There is no fee to download. When downloading, you may need to know your App Store password. This is something personal to you and not related to the hearing aid.

SIGNIA ASSISTANT YOUR VERY OWN HEARING COMPANION

signiausa.com/signia-assistant

Life sounds brilliant.

PERSONAL SUPPORT AT YOUR FINGERTIPS

Meet the **NEW Signia Assistant**, your very own complimentary hearing companion to help you stay fully involved in life.

The Signia Assistant gives you:

- **Highly intuitive support** at any time of day within the Signia App
- **Settings tailored to your personal preferences** for an even more natural sound and better speech understanding in every environment

Using artificial intelligence, the Signia Assistant learns your preferences to give you the most personalized experience.

All you need to get started with the Signia Assistant:

- Your **Bluetooth-enabled** Signia Xperience hearing aids
- The Signia App on your smartphone

HOW TO GET STARTED WITH THE SIGNIA ASSISTANT

When opening the Signia App, the Signia Assistant's face appears at the top right of your screen

Simply click on it and the Signia Assistant will welcome you and ask how it can help

Based on your answers, the Signia Assistant suggests instant sound improvements for you

You can: keep the new settings, revert, or improve them further

Choose from a list of options to address your need

Continue to answer the Signia Assistant's questions to ensure your concerns are addressed

Under "Settings" you can start a new chat, learn about our data policy, or revert from your current settings to the hearing care professional's settings

You can also start a new chat after you finish a dialogue with the Signia Assistant

The same steps apply when you have handling questions.

8 out of 10 people would recommend trying hearing aids with the Signia Assistant to a friend.*

* Data on file

93% of wearers say the Signia Assistant boosts their confidence to rely on their hearing aids and lets them feel more in control of their hearing success.*

STYLETTO X

HEAR WITHOUT COMPROMISE

STYLETTO X

Actual size

With its revolutionary Signia Xperience chip, Styletto X is as sophisticated inside as it looks on the outside. It delivers clear sound and speech understanding to meet your hearing needs, even in noisy environments. Unique acoustic-motion sensors allow Styletto X to optimize your hearing to every situation so you can hear what matters, whether you're out running, in a noisy store or restaurant, or relaxing at home.

STYLETTO X HEAR WHAT MATTERS TO YOU

WORLD'S FIRST
ACOUSTIC-MOTION
SENSORS

Giving hearing aids a new sense to understand your needs.

Styletto X takes motion into account so you can easily follow conversations, even when you're on the move.

Take in the richness of life.

More than 90 percent of wearers report a natural sound experience while moving.³ With Styletto X, everything sounds clear and you recognize the direction sound is coming from.

³ Froehlich, Branda, Freels: Evidence for Dynamic Soundscape Processing benefits (Signia White Paper, 2019)

STYLETTO X CHARGER CONVENIENCE TO GO

Styletto X combines iconic design with innovative charging convenience for the ultimate solution in wearability. It provides a full day's wearing including 5 hours of streaming.⁴ You can enjoy your favorite TV shows, movies, and music, plus stream calls straight to your hearing aids whenever and wherever you want.

Elegant charging case
Quick and easy-to-open lid
with charging status LED lights,
visible even when closed

⁴ Based on 16 hours wearing incl. 5 hours streaming per day

The pocket-sized portable charging case is the world's first hearing aid charger with Qi wireless technology, enabling you to simply place the charger on a charging pad instead of having to plug it into a wall outlet. Wherever you're going, Styletto X goes with you. Its charging case delivers an astounding 3 days of extra charges free from plugs or cables.⁵

Styletto X is fully charged in just 4 hours. Plus, a 30-minute fast charge provides an additional 5 hours of use for complete flexibility on the move.

⁵ Based on 19 hours wearing per day, or 16 hours wearing incl. 5 hours streaming per day

SIGNIA APP

PERSONAL SUPPORT AT YOUR FINGERTIPS

Styletto X offers
full control and
remote assistance
via the **Signia App**.

Signia App
Compatible with Android and
iOS. The app is free of charge.

Signia Assistant is your very own hearing companion to let you stay fully involved in life and hear what matters to you.

Using artificial intelligence, Signia Assistant immediately offers quick and easy support whenever and wherever you need it. It is available any time of day within the Signia App to help you adjust the sound settings, answer your questions about how to handle your hearing aids, and troubleshoot any issues on the spot.

Signia TeleCare™ enables you to keep in touch with your hearing care professional (HCP) so you get support when you need it – even when you cannot visit them in person. You can also send your HCP instant feedback on your daily satisfaction with your hearing aids.

Tinnitus comes in many forms.

Tinnitus that occurs temporarily, for instance after a loud concert, it is called acute tinnitus. For millions of people though, the noise is permanent (persisting for more than six months) and is referred to as chronic tinnitus. Approximately one in five individuals describe their tinnitus as unpleasant to unbearable.

Facts about tinnitus

Tinnitus can be classified into two categories: objective and subjective.

- Objective tinnitus is rare and can be heard by another person. It can also be directly measured by a Hearing Care Professional. Generally, the cause can be treated medically.
- Subjective tinnitus, on the other hand, is only audible to the sufferer. The tinnitus is internalized - with no direct external noise source. Although this type of tinnitus cannot be measured by standard audiometric testing procedures, a Hearing Care Professional can match the pitch or sound of their tinnitus to known sounds.

The information in this document contains general descriptions of the technical options available, which do not always have to be present in individual cases and are subject to change without prior notice.

Life sounds brilliant.

Tinnitus relief.

What is tinnitus?

Tinnitus is described as a phantom auditory perception in the absence of an external sound source.

Facts about tinnitus

- Tinnitus is a common disorder with many possible causes.¹
- 10% to 15% of the population suffers from chronic tinnitus (over six months).²
- Over 90% of people with tinnitus are also affected by hearing impairment.³
- About 20% of patients with tinnitus find the symptoms difficult to endure.⁴

signiausa.com

Minimizing the effects of tinnitus.

Hearing aids

Hearing aids not only improve hearing, but in most cases alleviates the effects of tinnitus by enriching the wearer's sound scape. Amplification enables the wearer to better focus on speech, music, and other interesting environmental sounds, which naturally draws their attention away from the tinnitus.

Tinnitus Therapy

Signia hearing aids feature tinnitus therapy options. Whether or not you have a hearing loss, therapy signals can be tailored to your needs that distract you from the annoyance of tinnitus. Therapy signals and other hearing aid programs can be easily controlled through a smartphone app, discreet remote, or directly from the hearing aid.

Three Therapy Options. Optimum results.

Signia offers three different strategies for managing tinnitus.

Signia Tinnitus Therapy Solutions

Signia offers a wide variety of hearing aids with tinnitus therapy solutions, including customs, BTEs, and RICs. Whether you are looking for a rechargeable option, *Bluetooth*®-enabled device for streaming, or hearing aids controlled via a smartphone app, your hearing care professional will recommend the best solution for you.

World's first: Tinnitus Notch Therapy

This proprietary therapy solution, only available in Signia hearing aids, can reduce the annoyance of tinnitus for a truly peaceful experience. All you have to do is wear your hearing aids as you normally would, and it could reduce the annoyance of your tinnitus in just weeks or months.

Ocean wave tinnitus therapy signals

What could be more relaxing than the sound of a seashore? Inspired by the tranquil sound of the sea lapping against the shore, ocean wave therapy signals replicate the relaxing feeling of being on a beach. Ocean wave therapy signals mimic the sound of the sea to provide a positive, soothing, and stress-relieving listening experience.

Static noise tinnitus therapy signals

Soft and gentle sounds that take away the annoyance of tinnitus helping you to relax and enjoy life. Signia hearing aids offer five different types of signals so your hearing care professional can help you choose the most comfortable solution.

Pure 312 X FEATURE OVERVIEW

- The world's first technology to **AUTOMATICALLY ADJUST** to changes in your environment and movements.

FACT 90% of activities involve motion.

- The world's first technology clinically proven to deliver **BETTER THAN NORMAL HEARING** in background noise.¹
