

Group conversations in noise are the biggest unmet need for people with hearing loss. A missed word can lead to a missed opportunity to contribute, which can lead to frustration and isolation. However, when we can hear others clearly and respond confidently, we can contribute to the conversation and live richer and more meaningful lives. Despite years of technological advancements, traditional hearing aids fall short of solving this problem.

That changes now. Signia, a leading hearing aid manufacturer, is challenging the status quo with breakthrough technology that accounts for the natural dynamics of group conversations, making it easier than ever for you to contribute and enjoy all the wonderful moments in life.

95% of participants perform better with RealTime Conversation Enhancement.*

**Hear every word.
Add to the dialogue.
Make a lasting impression.**

Introducing Signia Integrated Xperience with RealTime Conversation Enhancement

Catch every word and respond with ease. RealTime Conversation Enhancement lets you hear multiple people even as they move or when you turn your head. Signia is setting the new standard in hearing aid performance, immersing you fully in the conversation so that you can talk comfortably.

How It Works

Signia Integrated Xperience with RealTime Conversation Enhancement is designed to help you be fully present and get the most out of life.

Integrated Xperience is the world's first hearing aid that can analyze, augment, and adapt the location of multiple conversation partners in real-time even as they move to offer significant improvement in speech understanding.

Analyzes the dynamics of the discussion

To reflect the richness of real-life conversations, Signia created a groundbreaking algorithm that processes an incredible 192,000 data points every second—identifying each speaker and analyzing their location and prominence.

Augments for comfort and clarity

Signia's Conversation Booster technology dynamically enhances voices, letting each cut through the noise and spring to life. At the same time, Signia's exclusive split processing provides comfort and clarity to help you focus on speech while being aware of your environment.

Adapts to the ebb and flow of conversation

Signia Integrated Xperience's ability to keep up with the pace of conversations ensures you can stay involved, no matter how lively things get.

The hearing you need, the style you want

Pure Charge&Go IX
